Technical Delegate's Report

After the race car numbers 31 and 22 were chosen for more extensive inspections.

Subject to these inspections was the on-car software. In detail, the following checks were performed:

Car connection available to FIA via jump battery as per TR Article 8.5.1.

Software program files uploaded from ECU matched those submitted for homologation.

All files submitted by each team relating to the electronics section of TD 010F checked against on car versions:

CAN configurations.

FIA DTV, including whitelist parameters and FIA fixed parameters.

Driver defaults (random selection checked from each car).

Race data supplied by team cross checked against FIA offloaded data.

All checks were found to be in conformance with the 2024 Formula One Technical Regulations.
