Technical Delegate's Report

After the qualifying session today it was checked on car number 77, that a 1 liter fuel sample plus the amount of fuel that would have been consumed to drive back to the pits could be taken (TR Article 6.5.2). It was possible to take a 0.090 litre sample.

As the amount of fuel needed to produce a 1 litre sample plus to return the car to the garage was calculated as 2.39 litre, I am referring this matter to the stewards for their consideration.

Jo Bauer

The FIA Formula One Technical Delegate
