Technical Delegate's Report

After the race of the British GP, car number 44 was randomly chosen among the top ten cars for more extensive physical inspections.

Subject to these physical inspections were the complete ICE air intake system including a thorough physical inspection of the engine plenum and the charge air cooler as well as all sensors related to the system, their loom routing and connections to the SECU and other units.

All inspected components were found to be in conformance with the 2024 Formula One Technical Regulations.
