### Technical Delegate's Report

After the race of the Styrian GP, car number 22 was randomly chosen among the top ten cars for more extensive physical inspections.

Subject to these physical inspections were the PU to chassis interfaces (intake system, breather lines, pressure charging elements, exhaust system, valve train gas feed, fuel pumps, fuel lines, lubrication system, hydraulic system, all cooling systems), control elements, their loom routing and connections to the SECU and other units.

All inspected components were found to be in compliance with the 2021 Formula One Technical Regulations.
